14 January 2005

Dear Ms Scott

REFLEX® LT and REFLEX® CE – Compliance to RoHS, Directive 2003/11/EC.

We confirm that REFLEX® LT and REFLEX® CE do not contain any intentional additions of cadmium, lead, mercury and chromium 6+. Thus the presence of these elements would originate from any trace impurities in the additives used, and would consequently be very low.

Also REFLEX® LT and REFLEX® CE do not contain any intentional additions of brominated flame retardants, including PBDE and PBB.

Thus we believe that REFLEX® LT and REFLEX® CE are in compliance with the relevant parts of EU Directive 2002/95/EC, Restriction of Hazardous Substances in Electrical and Electronic Equipment (RoHS)

Please contact us again if you require any further information.

Yours sincerely

Mark Chappell
Sales & Marketing Director, Europe
